

Einfache Bruchrechnungen

Erst kürzen, dann multiplizieren!

Name: _____

$$\frac{3}{4} \cdot \frac{1}{3} = \underline{\hspace{2cm}}$$

$$\frac{3}{8} \cdot \frac{2}{3} = \underline{\hspace{2cm}}$$

$$\frac{1}{8} \cdot \frac{2}{3} = \underline{\hspace{2cm}}$$

$$\frac{5}{8} \cdot \frac{2}{5} = \underline{\hspace{2cm}}$$

$$\frac{4}{5} \cdot \frac{2}{3} = \underline{\hspace{2cm}}$$

$$\frac{3}{5} \cdot \frac{2}{5} = \underline{\hspace{2cm}}$$

$$\frac{3}{4} \cdot \frac{7}{3} = \underline{\hspace{2cm}}$$

$$\frac{3}{7} \cdot \frac{3}{4} = \underline{\hspace{2cm}}$$

$$\frac{3}{8} \cdot \frac{2}{3} = \underline{\hspace{2cm}}$$

$$\frac{2}{9} \cdot \frac{3}{5} = \underline{\hspace{2cm}}$$

$$\frac{1}{8} \cdot \frac{7}{4} = \underline{\hspace{2cm}}$$

$$\frac{1}{7} \cdot \frac{7}{8} = \underline{\hspace{2cm}}$$

$$\frac{5}{8} \cdot \frac{11}{3} = \underline{\hspace{2cm}}$$

$$\frac{5}{8} \cdot \frac{4}{5} = \underline{\hspace{2cm}}$$

$$\frac{2}{3} \cdot \frac{3}{5} = \underline{\hspace{2cm}}$$

$$\frac{2}{3} \cdot \frac{7}{9} = \underline{\hspace{2cm}}$$

$$\frac{4}{5} \cdot \frac{13}{8} = \underline{\hspace{2cm}}$$

$$\frac{4}{5} \cdot \frac{11}{12} = \underline{\hspace{2cm}}$$

$$\frac{1}{5} \cdot \frac{7}{6} = \underline{\hspace{2cm}}$$

$$\frac{8}{10} \cdot \frac{5}{7} = \underline{\hspace{2cm}}$$

$$\frac{5}{8} \cdot \frac{4}{5} = \underline{\hspace{2cm}}$$

$$\frac{2}{5} \cdot \frac{15}{20} = \underline{\hspace{2cm}}$$

$$\frac{2}{3} \cdot \frac{7}{15} = \underline{\hspace{2cm}}$$

$$\frac{2}{4} \cdot \frac{3}{8} = \underline{\hspace{2cm}}$$

$$\frac{6}{7} \cdot \frac{3}{4} = \underline{\hspace{2cm}}$$

$$\frac{6}{7} \cdot \frac{1}{4} = \underline{\hspace{2cm}}$$

Lösungen

$$\frac{1}{8} \quad \frac{1}{4}$$

$$\frac{9}{28} \quad \frac{1}{4}$$

$$\frac{1}{4} \quad \frac{55}{24}$$

$$\frac{7}{4} \quad \frac{8}{15}$$

$$\frac{6}{25} \quad \frac{2}{15}$$

$$\frac{7}{32} \quad \frac{13}{10}$$

$$\frac{14}{27} \quad \frac{1}{12}$$

$$\frac{2}{5} \quad \frac{1}{2}$$

$$\frac{3}{10} \quad \frac{11}{15}$$

$$\frac{14}{45} \quad \frac{4}{7}$$

$$\frac{3}{14} \quad \frac{7}{30}$$

$$\frac{9}{14} \quad \frac{1}{2}$$

$$\frac{1}{4} \quad \frac{3}{16}$$
